Profile:

You're not only hiring a CV but also personality, sense of duty, responsibility and values. I'm experienced with, offshore (nautical & project side) and onshore projects and capable of blending into your project team to provide logical and practical solutions acceptable and valued by all involved. Shipping Lane was founded in 2002 and is my brand providing HSSEQ services to the offshore energy industry (oil, gas, wind, wave, tidal and decommissioning).

Work history:

---	--

Private:

I ride a motorcycle for commuting and fun. To relax and stay healthy I run ≈20km a week. Tried to play drums my whole life without succeeding. Continuing that 'career' with a bass guitar now. I love progressive rock.

Characteristics:

Open minded, social and getting along well with various cultures. Ambitious, stubborn, enthusiastic, flexible, loyal, impatient, precise. I love to observe and listen and will contribute to the conversation but seldom as 'primary reaction'. I love personal goal setting and proclaiming declarations to make things happen, e.g.:
"I'm going to run a marathon but it need to be a special one." I ran the Australian Outback Marathon in 2016.
 My motto is: 'work hard, play hard, rest hard, be outspoken and open'.
